

# THE GLEICHEN CALL

VOLUME XXVIII NO. 6

GLEICHEN, ALBERTA, WEDNESDAY

APRIL 24, 1935

SUBSCRIPTION \$2.00 PER YEAR

## TOWN FATHERS IN REGULAR MONTHLY SESSION

At a meeting of the Town Council it was planned to do what they could to help along the silver jubilee celebration on May 6th. Councillor A. F. MacCallum was appointed to represent the Town Council.

A letter had been received from the Department of Public Works regarding resurfacing the gravel high way through the town. The letter stated the town was responsible for half share for the mile through the town if they wished to have it done while the contractors were on the job. The town is agreeable to have the work done providing the government would wait until 1936 for payment as it had not been included in the estimates for this year.

The council was informed that H. Little had been admitted to the Evenden Home since it was very necessary that he be taken care of.

The secretary advised the councillors that caveats under the Tax Recovery Act had been duly filed. The council, passed a by law to borrow money from the Bank of Commerce for the year 1935.

## MISS ANNA KENT LOCAL TEACHER DIED THURSDAY

Following an illness of three weeks Miss Anna Kent died last Thursday morning. During the past winter Miss Kent had not been feeling very well suffering from a cold which she was unable to get rid of. Three weeks previous to her death she was taken down with pneumonia. Several days before her death her sister-in-law, Mrs. Adam Kent, arrived from Ontario. Thursday afternoon funeral services were held by Rev. J. R. Davies of Ogden, in the Community Hall, which was largely attended after which the remains were taken to the station and shipped to Forest, Ontario for interment in the family plot.

Miss Kent came to Gleichen 10 years ago taking a position with the Gleichen public school. She was born in Warwick Township, 48 years ago. Surviving are two sisters and one brother.

The passing of Miss Kent will leave a very noticeable gap in the continuity of the public life of the town. Noteworthy as an individual and more noteworthy as an example of efficiency in her chosen work, Miss Kent was one of those people who are factors in moulding the opinions of those with whom they are in contact. Always cheery, always ready to help, in any deserving cause, with opinions quite definite upon whatever she had read or thought about she was no negligible factor in any company she happened to be, and one has had, on many occasions to admire her grasp of a difficult situation and to respect her sound common sense in matters of daily affairs. She has left a large circle of friends who loved and respected her for her sterling personal qualities of friendship and of loyalty.

As a primary teacher, Miss Kent was well-known far and wide for her skill and efficiency in this most exacting form of educational responsibility. Her cheerfulness was a constant factor of her appeal to the little tots who embarked on the voyage of school-life under her pilotage. They trusted her and then loved her. Her word was law to these little ones, not because they must do this or that but because it was sufficient for them that Miss Kent would like to have them do it in that way. Every child in her room tried to please Miss Kent and was well rewarded by her smile and words of praise. Those of us who saw the way in which they took part in the school concert recently realized how she held the affection of her scholars.

Those who were in close contact with her marveled time and again at the constant and unfailing cheerfulness that actuated her through the day even when there had been nights of suffering following a hard and exacting day in the schoolroom. Never late; never absent; always cheerful; always kindly; never too busy to attend to little problems; never too occupied to make the pathway smoother for some little feet; always on the look out to help the little ones

## H. W. PIERCY WILL BE AT UNITED CHURCH NEXT WEEK

One of Canada's most popular artists in the person of H. W. Piercy, is to visit Gleichen on Tuesday, April 30th. He will appear in a miscellaneous program of humorous and dramatic numbers and will be assisted by local artists, Mrs. J. A. McArthur, Mr. Elmer Bollinger and Mr. and Mrs. Birch. A pleasant and profitable evening is assured. This event will take place in the United Church, April 30th, at 8 p.m.

## YOUNG LIBERALS TO HOLD MEETING THIS WEEKEND

Plans for the forthcoming Young Liberal Conference to be held in Calgary, Friday and Saturday, April 26 and 27, are progressing favorably according to reports from the various conference committees.

The resolutions committee has drafted a most inclusive schedule of subjects for debate, including those which are of vital interest to young Canadians. Speakers well versed on the political questions of the day have already been invited to lead the discussions.

The young men of the MacKenzie King Young Liberal Club of Calgary have worked in conjunction with the young ladies of the Twentieth Century Club in contacting various clubs from Stettler, south to the border and the Edmonton Young Liberals, having communicated with clubs in the north end of the province report that a large delegation will be present from these districts.

An informal dance will be held at the Bowman Golf Club in the evening of Friday, April 26th. The final meeting will be held Saturday evening in the Palliser Hotel, will be addressed by Mr. W. R. Howson, Provincial Liberal leader, and other prominent Liberal members and candidates. A provincial broadcast has been arranged to cover the meeting.

## ITS BENEFITS UNIVERSAL

Many people have not learned to look upon advertising in the light of the realistic rhyme of an olden time who penned this famous verse on advertising:

...Go forth in haste; with bills and parchment to all creation.

That men are wise who advertise in every generation.

In a large part the public regards advertising as being of possible advantage to the advertiser for which the consumer pays, and yet the facts prove otherwise. Time and again has it been shown that well judged, properly conducted and persistent advertising insures to the benefit not only of the person who attracts attention to his wares in this manner, but also to the community.

After interviewing large numbers of distributors as to the economic effects of advertising, a committee of the national distribution conference reports:

"Broadly speaking, it would seem that where the advertising creates an increased demand for products of a certain class a wider distribution of such products—in other words, makes new business, bringing about lessened distribution costs and lessened production costs owing to increased demand—there can be no doubt as to the value of such advertising, not merely to the concerns that pay for it but also to the public that consumes the goods."

"Bills and parchment" have given away to newspapers and magazines and those "who advertise" are not only wise but altruistic and philanthropic, for by helping themselves they are helping others.

V. Pedersen of Chancellors was a business visitor to town for a few hours last Friday.

committed to her charge she well deserved the love and respect we ungrudgingly accorded her. If an employer needed none will suffice more truly than the words of the poet,

"Life's more than breath and the quick round of blood,  
It is a great spirit and a heavy heart."

## TENNIS COURTS WILL OPEN SOON FOR SEASON

The work of putting the tennis courts in shape for the coming season is progressing very favorably. It has been decided not to resurface the courts until irrigation water is available. The courts will be ready, however, for practice by the first of May, and all those intending to play tennis are invited to attend a meeting to be held in the office of the Crown Lumber Co. on Monday next, April 29th, at 8 p.m.

This meeting is for the purpose of organizing a tennis club, electing officers, estimating fees, etc., and also to get an idea of what players are available for the district competitions and inter-town matches.

## HOW TO PROTECT YOUR SHRUBS FROM DOGS

A dog at liberty, even in the exuberance of newly-found freedom, seldom misses an opportunity to explore every hole and corner in the course of his promiscuousness, and a cat, just goes and fights where it likes. Unfortunately this super-abundant energy is accompanied by damage to garden and other property in the environs. Neither the dog or cat have the slightest respect for flower beds or for the cherished ornamental plants on the front porch, and often these animals show a distinct antipathy to shrubbery. In their boisterous way they create a lot of damage and it is not always possible to drive them away in time. However, an enterprising entomologist has found a way out of the difficulty. Taking a hint from the methods of entomologists in dealing with insect pests on garden plants, it was discovered that nicotine sulphate, this widely-used insecticide, provided an effective measure for keeping dogs and cats at bay. The odour of nicotine is very repulsive to dogs and cats and as their sense of smell is very much keener than that of human beings it is possible to use the compound so diluted so that flowers, shrubs, buildings, walls or walks are not damaged, but cats and dogs will avoid the sprayed areas. The spray evaporates in time and will be washed off by the rain. Therefore it should be renewed every two weeks, and after heavy rains. A week solution should be used, such as a tablespoonful of nicotine sulphate to five gallons of water. The solution is also a good insecticide.

## THE SPRING HABIT

Spring is an untiring miracle, no less so than today than when men were more inevitably concerned with the seasonal moods of another earth. The ancient mystery is renewed each year by which rich life and color and eager growth spring again from the winter locked land. A few days of kindly sun and the resurrection is begun, the life resumes, the world renewed with beauty.

Life endures the winter but blossoms with the spring. All things good and full of promise answer the warm welcome of a friendly sun. Because nature is grown again, the world is once more fruitful.

From this seasonal certainty we may pick a lesson. Men likewise grow better and work better in good weather. Hard times and harsh discipline, whether of men or circumstances, may test and toughen endurance and stiffen courage and fiber, but growth and usefulness flourish better in the warmth of good will and kindness. These are the spring tonic of human life, which can awaken all its hidden powers and riches. We grow better, work better and are in all ways happier in the habit of mutual encouragement and the widespread warmth of genuine good will.

A letter in one of our exchanges last week mentions some of the prices that are being paid for food and other articles over in England in comparison with those being paid here: Eight horse power cars cost \$800, and seven-seater limousines \$2,780; butter 26c a pound; milk 14c a quart; honey 50c a pound; eggs 30c a dozen; cheese 20c a pound; apples 4c to 12c a pound; back bacon, 32c; average cut of beef 35c a pound; average cut lamb 25c; potatoes \$1.85 for 112 pounds; suit of clothes, \$12.50 to

## FUNDS FOR CANCER RESEARCH SHOULD BE SENT AT ONCE

May 6th will be here before we know it. On that day His Majesty King George V will celebrate the 25th year of his reign. Greetings and mementoes will be showered upon this popular sovereign, in his London home. And not the least welcome will be the report of the Silver Jubilee Cancer fund, bearing the names of those who contributed to this splendid gift, as Canada's National recognition of the day.

His Majesty will be acquainted with the amount raised and the details of the campaign, but every cent donated will be used to combat cancer in Canada.

Never has an appeal met with such a sympathetic response, thousands have promised to give their support by sending a donation. But it is so easy to leave until tomorrow. The cancer committee for Alberta appeals to you to send your donation today, no matter how small. Place it in an envelope, enclose your name and address, written plainly, and address to Lady Beakborough, Ottawa. You will receive a personal acknowledgement from her Excellency. In order that the lists may be completed before May 6th, the committee asks that everyone planning to help this worthy cause do so in the next few days.

The heart of the cancer problem today is early diagnosis followed by prompt and expert application of every known and well established method of treatment. Stressing the curability of cancer, the American College of Surgeons in its symposia of 1932 and '33 placed on record the five year cures of 24,448 cases.

Through cancer education, cancer treatment and cancer research, Canada hopes to attack this dread disease. Canada was the first to discover insulin which has saved the lives of thousands of diabetic sufferers. Canada may again lead the way in cancer research. Your dollar will help make this dream come true. Send it today.

\$36.50; bread, 2 pound loaf, 7c; sugar 12 pounds 66c; gasoline 34c to 41c a gallon. The average workman earns \$12.50 for a forty-eight hour work week.

## Here and There

LT-Col. F. A. Gascoigne, recently retired secretary-treasurer, Canadian Pacific Steamships, has been elected president of the Dominion of Canada Rifle Association at the annual meeting of the Association held recently, succeeding LT-Col. R. C. Crowe, of the Ministry of National Defence.

D. S. Thomson, who has been appointed assistant superintendent, Canadian Pacific Railway, Smiths Falls, was prior to his promotion, chief clerk in the office of the vice-president and general manager of the railway at Montreal. On leaving to take up his new appointment he was presented with a gold standard railroad watch and a purse of money by his fellow-workers in the office.

Just 165 years ago the first Daily settled in Nanaimo and a few nights ago his descendants, Marjorie and John Daly, celebrated the momentous occasion at a supper dance at the Royal York Hotel, Toronto. This makes the sixth generation of the Daly family continuously resident in Canada.

Sixty-two calls at European ports will be made by the five express "heavier" class cargo steamers of the Canadian Pacific fleet this summer, according to the schedule recently announced by Canadian Pacific Steamships. Crossings will take nine and a half days in each direction and will touch at London, Antwerp, and Hamburg.

An appeal to the press to mould public opinion in support of larger funds for medical research, particularly into the cause and control of cancer, was voiced by LT-Governor Bruce of Ontario, at the Royal York Hotel recently at the banquet which wound up the seventh annual convention of the Canadian Weekly Newspaper Association, Ontario-Quebec Division.

Shooting and bear-hunting were combined at the Bako Camp, Metagana, recently, when two women officers of Toronto, accompanied by a photographer, routed a bear out of his den and stood near while the animal was "shot" by a movie camera.

Due to unfortunate circumstances, the hockey club winds up the season considerably in the "RED" and an endeavor will be made to balance the ledger in order to start with a clean sheet next fall. A dance will be held on May 6th, in the Gleichen Community Hall, for this purpose and since this is a public holiday, the King's 25 Year Jubilee it would be much appreciated if other organizations in the district would not sponsor anything on that day which might interfere with the success of this event.

W. SUTERMEISTER,  
Sec.-Treas., Gleichen Gunners.

## A Welcome Declaration Of War

The people of Canada, under the leadership of Their Excellencies the Governor-General and Lady Bessborough, supported by the Dominion and Provincial Governments, all political parties, the churches, the press, the medical profession, organizations of every description, and men and women of goodwill throughout the length and breadth of the Dominion, have decided to commemorate the twenty-fifth anniversary of the accession of King George V. to the throne of the world's greatest empire on May 6 by a declaration of war.

Canadians are a peace loving people; they abhor war, and their whole history proves that they never engage in it except when absolutely forced to do it in self-defence, but, once in, they fight to the finish with all the strength, energy and resources they can command. Fighting in their own defence they never remain on the defensive but adopt vigorous offensive tactics to bring about the defeat of the common enemy and safeguard their own existence. History proves this to be true.

So, with the lives of thousands of their people at stake, all Canada has decided to mark the Silver Jubilee of His Majesty, who has been well described as a kindly man and a manly king, by a declaration of war upon a common world enemy—cancer. The ammunition required to prosecute this war is—money. Money is necessary in the conduct of all wars, and in 1914-1915 Canada supplied it in the hundreds of millions, yes, billions. In this new and humanitarian war a substantial war chest is essential to success, although not in the enormous sums referred to above. Every Canadian family is asked to contribute to the extent of their ability.

Mankind is forced to wage a continuing war against disease, and looking back over past years it is gratifying to know that, taken as a whole, it has been a successful war. A few years ago the great scourge was Tuberculosis, the White Man's Plague, which topped the list of diseases affecting the race. To-day it is in retreat, now far down in the list, with a steadily diminishing number of victims.

Yellow fever, which once counted its victims by the thousands, is unknown; smallpox has been eradicated; diphtheria, which carried off children by the thousands, has been conquered through the discovery and use of anti-diphtheria serum; cholera, typhus, and other plagues are now practically unknown, with the result that the expectation of life as been more than doubled, nearly trebled, within the past 100 years.

On the other hand, the ravages of cancer continue to increase until to-day it is responsible for more deaths than any other disease with the single exception of diseases of the heart. Cancer comes second on the list and in 1933 was responsible for 10,946 deaths in Canada as compared with 7,614 only seven years previously in 1926, and the toll is progressively rising higher each year, having increased from 93.9 per 100,000 in 1931-32 to 100 per 100,000 in 1933.

This is the common enemy that now calls Canada to arms and has resulted in this Silver Jubilee declaration of war.

Contrary to a view widely held, cancer is not an incurable disease. It can be cured if it is discovered and treatment commenced in its early stages. Early diagnosis is the all-important factor. But to secure early diagnosis involves, first, education of the public, the provision of a largely increased number of qualified diagnosticians, and facilities for treatment throughout the whole country. These are the essential manacles in this war, and they cost money.

The people of Canada, the rich, the merely well-to-do, even the poor, are called upon to enlist in the army of attack on this dread enemy which is now on the offensive against our people and scoring a victory over us. As a Canadian people we must now take the offensive, take it boldly and in a large way, and fight back. If we do, success can and will be achieved.

The idea of the "King George V. Silver Jubilee Cancer Fund for Canada" is an admirable one. It will be administered by trustees and every dollar will be spent in Canada, in the saving of Canadian lives. To establish that fund each Canadian family and household is asked to contribute one dollar, or as many more dollars as they can. Contributions may be sent to Lady Bessborough, Government House, Ottawa, who will acknowledge every donation received, large or small, on a card bearing the portraits of the King and Queen.

Thus does Canada propose to commemorate the Silver Jubilee of His Majesty by the creation of a permanent national anti-cancer fund. It will be an expression of the loyalty and affection of the Canadian people to His Majesty and at the same time a tangible, lasting and humanitarian record of a great national event.

We are glad to add the support of this column to the nation-wide appeal now being made in support of this effort to commemorate a reign that is one of the finest in British history in a manner which has received the gracious approval of His Majesty and as something designed to be of lasting value to suffering humanity.

## The Right Of Way

According to the new traffic regulations in England the pedestrian has the right of way and motorists No. 1 is a very small pea. No. 2 is not entitled to make anybody larger; No. 3 is still larger, and so on, "pull back" at a crossing, the Marylebone magistrate, Ivan Snell, stated in fining a woman motorist \$2.50.

A police judge says women now do 70 per cent. of the driving. But ming bladder of the cod and sturgeon still hold the steering wheel.

## Building Traffic Subways

Paris Found First One To Be Huge Success

Because of the success of the first traffic subways, Paris is pushing the construction of additional ones. These passages are designed to insure the continuity of the circular road built in place of the former fortifications surrounding Paris. This road, complete, will be nearly 20 miles long, 133 feet wide, and will permit the passage of six rows of cars. Side-walks on each side of the road are over three feet wide. Where this circular route meets the main arteries leading out of Paris it has been attempted, wherever possible, to direct traffic around a central plateau which serves as an axis. This eliminates to a certain extent the danger resulting from the crossing of cars from various directions and helps to reduce traffic tie-ups.

## Arcades For London Streets

Expert Predicts City's Shopping Centres Will Be Covered

Women will soon be able to do all their window-gazing under cover in London, according to a merchandising expert, who says that the shopping centres will be a series of arcades. Merchandise will emerge from the shelter of the stores, where they already are continuously on display, and appear in windows in place of the present wax figures, which have gone from the realistic to the fantastic and back again.

## WAS CONSTIPATED FOR 30 YEARS

## Woman's Long Search For a Remedy

The trouble with most remedies for constipation, as this woman found, is that they give only temporary relief. Having at last found a permanent corrective, she writes to tell us about it—

"For upwards of 30 years I was a victim of acute constipation. I tried practically everything that it was possible to try. I admit I was a chronic case, and every now and then I tried relief for a day or two—after that I was just as bad as ever. Three months ago I took my first taste of Kruschen Salts, and every morning, and every morning so long as I live, my first duty upon rising is my Kruschen. I feel free, a different woman. My bowels act to the clock, and my friends remark how well I am looking. My only regret is that I didn't try Kruschen years ago."

(Mrs. A. M. Kruschen Salts is Nature's recipe for maintaining a condition of internal cleanliness. The six salts in Kruschen stimulate your internal organs to smooth, regular action. Your system is thus kept clear of those impurities which allowed to accumulate, lower the whole tone of the system.)

## English Town Thrift

The changing times have not changed the Yorkshireman's thrift. When the people of East Winton in North Yorkshire met to arrange their jubilee celebrations they found the village still had a balance left over from the coronation of their Majesties 25 years ago. So East Winton will use it to celebrate their jubilee.

## Object To Uniform

Typists of Turkey are angry over the threatened rule of the Turkish government that they must wear a standardized uniform. A bill introduced in the Ankara parliament declares that the girls have dressed too frivolously, and they should wear a dark and simple costume. The typists declare such a rule would prevent them from developing their individuality.

## Best She Could Do

A rather stout woman was making herself a nuisance in the big shop which was holding its annual sale. Nothing, it seemed, would suit her, and the unfortunate shop-assistant was beginning to get a little weary. "Haven't you anything ready-made that will fit me?" asked the customer at last. "Yes; the umbrellas and the handkerchiefs are downstairs, madam," the girl replied.

## "Growing" A Sea Wall

Rice Grass Effective In Preventing Flooding Of Land

The cultivation of rice grass on the low-lying lands of Essex and other similar mud flats in England may result in turning thousands of acres of waste land into profitable pasture. Spartina grass became known in Great Britain about 100 years ago through a few seeds dropping accidentally from some cargo ships at Southampton Docks. They took root and formed a hybrid with British grass which attracted the attention of agricultural scientists who saw the possibility of "growing" their sea wall instead of spending thousands of pounds on sea defence to prevent the land being flooded. Experiments have proved that such a wall is not worn away by the tide, and now Holland and Australia are planting rice grass with a view to converting large tracts of marshes into pastures.

## Bonus Paid On Coal

Canada Has Paid Out Over Six Million Dollars Since 1928

Since 1928 Canada has paid \$6,781,176 in subventions and other forms of assistance to aid the coal industry in the Maritime provinces and Alberta, a return tabled in the House of Commons said. Of that amount \$4,457,992 went to the Maritimes and \$1,859,908 to Alberta.

Payments made generally by the trade and commerce department to the assets in placing Canadian coal used in the manufacture of iron or steel on a basis of equality with imported coal amounted to \$465,273, while "additional payments" made under the Domestic Fuel Act to the Maritime coal industry totalled \$87,835. From 1928 to the present the amount of bonus paid on wheat was \$12,708,576. The outlay in the year 1931-32 when the five-cents-a-bushel bonus was in effect was \$10,908,428.

## Correspondence Of Kings

Findings In Palestine Date Back To 700 B.C.

The correspondence between two kings dating back to the time of Jeremiah, 700 B.C., has been discovered by the archaeological expedition led by Prof. J. L. Starkey, of Great Britain, it was learned. The discovery was made at Tel Ad-Dumweir, ancient city of Lachish. It consists of 12 Ostraka fragments, which are taken to be an exchange of secret letters between the kingdom of Judah and the kingdom of Babylon or Egypt.

Details of the findings were made known to the Palestine government, but were not given out to the press.

## Should Be Lucky

Schoolmaster In England Has Collection Of Unusual Horseshoes

A schoolmaster at Wimbledon is an ardent collector of horseshoes. But not ordinary horseshoes. He specializes in ancient horseshoes. The walls of one of his rooms are covered with scores of them. They even overflow to other rooms. One of his horseshoes was discovered on the site of a Roman camp. In all probability it was cast from the foot of a charger ridden by a Roman general.

## School Named After Prince

The Prince of Wales has consented to his name being given to a school for underprivileged boys established in British Columbia along lines identical with similar schools set up in Australia for some years past. The institution in British Columbia will be known as the "Prince of Wales Fairbridge Farm School."

It was a great Roman who said two thousand years ago, and it is still true, that those who take friendship from life blot out the Sun from the world.

## Installs New Equipment

Montreal Institute One Of Leading Cancer Outposts

The Radium Institute of Montreal became one of the leading cancer treatment hospitals in the world with installation of apparatus generating 500,000 volts. The institute hopes to raise the voltage mark to 1,200,000 in a short while. Dr. J. E. Gendreau, director, announced.

"Ultra penetrating X-rays at a voltage of 500,000 were put in operation only after extremely careful physical measurements preparatory to cancer treatments, and the apparatus has been used for the first time on patients," Dr. Gendreau said. "This apparatus is the largest and most powerful in Canada and is surpassed by a few in the United States or Europe," he said. He stressed the necessity of adequate institutes in different countries to fight cancer with great success.

The world has about six million square miles of ice to-day, most of it in Antarctica, but when the last ice age was at its height there was about twice as great an area of the world ice-blanketed.

## Pedigree Certificates

The total number of pedigree certificates registered by the Canadian National Livestock Records, approved by the Dominion Minister of Agriculture, for the month of February 1935 was 6,916, as against 6,489 for February 1934. Horses numbered 228; cattle, 2,111; sheep, 481; swine, 460; dogs, 529; fowls, 2,928; poultry 160, and one goat.

## Banish Constipation Nature's way!

A Natural Corrective... doctors advise its use to get rid of Constipation

Take your doctors' advice! If you suffer from headaches, bad breath, sour stomach and other constipation ills... use Quaker Bran.

Remember, Quaker Bran is different from all prepared bran cereals. It is pure bran, uncooked—untreated—unadulterated. For these reasons it is definitely richer in mineral and vitamin content.

Quaker Natural Bran works with nature to induce normal

healthy bowel movement. It is safe, effective and gentle. And it saves you money because it allows you to dispense with costly drugs.

Serve Quaker Natural Bran with your regular cereal each morning. It is ideal for muffins, cookies, etc. A booklet of tested recipes for many delicious bran dishes is in every package.

## QUAKER BRAN

Pure, Natural, packaged bran.

## Crow Destruction Campaign

Definite Move Being Made To Protect Game Birds

The Saskatchewan Fish and Game League, in its annual convention at Moose Jaw in June, 1934, decided to sponsor a definite and carefully planned campaign of crow destruction. The first step in this campaign is the move to establish, throughout Canada, a National Crow Destruction Week, to commence on April 22 next.

Roy Holland, trained observer and editor of Field and Stream, when on his Saskatchewan shooting trip in the fall of 1934, estimated that one flock of crows which passed by him in the space of an hour or so, contained two hundred and fifty thousand. Assuming that one half of these crows were successful in destroying one game bird's nest, of an average of eight eggs, then one million game birds were denied the right to live, by this one flock of fifty thousand.

How many similar flocks existed in the wide space between Halifax and Vancouver no one knows, nor is it possible to even guess at the total damage inflicted by these black hearted plunders on the game bird and kind wild life of the country.

Will sportsmen accept the challenge, that is thrown out to fight for their heritage of good hunting in Canada? Will those who do not

hunt with a gun but with the camera and the notebook of the naturalist, accept this challenge? Will the Provincial Governments and the Game Departments waken up to their duty and assist in ridding the country of this pestilent plague? Will every branch of the Fish and Game Leagues in the country, make definite plans, before April 22nd next to—

- (a) Shoot every possible crow.
- (b) To erect all the crow traps, they can build with the funds available.
- (c) To organize the school children to collect crow eggs on a bounty basis.
- (d) To enlist the support of provincial governments and game departments.
- (e) To continue their efforts throughout the summer and in of defenceless game and song birds.

### A Famous Scholar

Englishman Knows 28 Languages And Many Oriental Dialects

Sir William Jones, an Englishman who lived in the eighteenth century, was one of the world's most famous scholars. He mastered 28 different languages, and had a working knowledge of many Oriental dialects. When Sir William was 33 years old he decided, in his own words, "to learn no more rudiments of any kind, but to perfect myself in, first, 12 languages, as the means of acquiring accurate knowledge of history, arts and sciences." These were Greek, Latin, Italian, French, Spanish, Portuguese, Hebrew, Arabic, Persian, Turkish, German and English.

Later, being sent to India, he extended his researches far beyond these seemingly ample limits. He was the first Englishman to completely master Sanskrit, and he attained a considerable knowledge of Hindostani and Bengali. He delved into the Indian dialects, such as the Thaketai, Pali, Phaludi, and Dert. Among the languages which he acknowledged to have studied least, but of which he had far more than ordinary knowledge, were Dutch, Swedish, Chinese, Syric, Welsh, Russian, Coptic, Ruman and Ethiopic.

### Too Costly To Keep

London Firm Is Anxious To Sell Valuable Diamond

The Diamond Corporation of London is trying to sell the Yonker diamond, the second largest gem found in the world, which is valued at \$375,000. It was found in South Africa in 1933. The possession and care of the gem costs the corporation \$15,000 a year, so that if it remains on their hands for 25 years it will have cost them just as much as they will get by selling it now.

### When Grade Marks Required

Grade marks on honey containers are required only in respect to honey moving from one province to another or out of Canada. The grades of honey in the order of quality are No. 1, No. 2, and No. 3. Within the grades are different classes designated as white, golden, amber, and dark.

If you had your life to live over again, of course you would live it differently but would you live a better life or just arrange to have more time for fishing?

### Not To Be Envid

King George Has Heavy Job And Few Privileges

Bruce Barton writing in the Chicago Herald and Examiner says: "The most underpaid man in the world is the King of England. This may sound like a joke, but it is not."

Travel wherever you will in the world you run across British possessions. India, with its four hundred millions; the treaty ports of Shanghai, Hongkong, Singapore; Canada, Australia, Bermuda, New Zealand, great stretches of Africa—immense, diversified territories each with its own interest, hopes, jealousies, ambitions. All ruled by a group of islands so small you can hardly find them on the map.

What holds them all together? The British monarchy. When at the close of every public gathering in the Empire the band plays God Save the King and everybody stands at attention—that is what keeps this heterogeneous collection of lands and peoples from flying apart. The emotional tie of loyalty—the universal reverence and affection of the King.

Recently we have heard talk of the "over-privileged." It is necessary to define the term. Who can measure privilege merely by title or wealth. Some rich men are over-privileged; some at whatever income, would still be underpaid.

The most underpaid of all is King George. He has few privileges. None of us would want to change places with him. His life is a dog's life—always on parade, forever signing papers and laying coronations. But he does the biggest job in the world, holding together the Empire on which the sun never sets.

### Bequest Has Reservation

Housekeeper Receives Fortune On Condition She Never Marries

If Miss Hetty M. Rayham remains single and lives in the dwelling at Tarrant, England, where she has kept house for years, she will receive \$500,000. When she learned of the condition in the will of the late Henry W. Prosser, by whom she had been employed as housekeeper for many years, Miss Rayham told a friend: "I have been single for so many years that I don't think I shall worry about getting married now." A friend of Miss Rayham reports that Miss Rayham intends to remain at the Prosser house. "She is known in the village as Miss Adams, and had been Prosser's constant companion for many years. She devoted her life to him and nursed him through the illness just before his death. She is aged about 50, and is extremely popular in the village," Prosser was an engineer.

### Registrations Are Up

An increase in registrations, transfers, memberships and receipts for the first two months of the year is the cheerful report just released from the head offices of the Holstein-Friesian Association of Canada. The number of animals registered was 4,465 and the number of transfers issued 2,729. Compared with the same period of 1934 this represents a gain of twenty per cent. in registrations and forty per cent. in transfers.

The new general manager was inspecting the branch office. "How long have you been working here?" he asked the office boy. "Ever since the day the boss threatened to sack me," replied the young man.

"I tried that recipe you gave me for Mustard Pickles Mary, but it didn't turn out at all like yours." "That's too bad Jane. I've always had such wonderful results with Keen's Mustard!" "Oh, I didn't use Keen's!" "There's your trouble, Jane, right there. Keen's Mustard has the strength, flavour and 'zip' that is not found in any other."

## KEEN'S D.S.F. MUSTARD

Made from seed grown especially in the Fens of England. The shells or hulls are removed, all the string being in the inner part of the seed. A special refining makes the full flavour readily available. In original tins for as little as 10c.

Cornwall-Koen (Canada) Ltd. 1000 Avenue Street Montreal, Que.

## TO ALWAYS GET FAST PAIN RELIEF

An Aspirin tablet starts disintegrating as soon as it touches moisture. That means that Aspirin starts "taking hold" . . . eases even a bad headache, neuritis or rheumatic pain almost instantly. And Aspirin is safe. Doctors prescribe it. For Aspirin does not harm the heart.

Be sure to look for the name Bayer in the form of a cross on every Aspirin tablet. Aspirin is made in Canada and all druggists have it.

### Remarkable Find

Ancient Seal Found In Palestine May Throw New Light On Biblical History

One of the most dramatic episodes in Biblical history was believed thrown open for new study as the result of the recent discovery at ancient Lachish of a seal from the reign of Gedalia, last of the kings of Judah, who was murdered by a pretender to the throne, it was revealed to the Palace Agency by a member of the archaeological expedition.

Characterized by members of the expedition as one of the most remarkable finds of its nature, the ancient seal has inscribed upon it in Hebrew:

"To Gedalia, who rules the house." It is presumed the seal belonged to Gedalia Ben Ahikem who ruled the remnant of the Kingdom of Judah after Nebuchadnezzar, king of Babylon, destroyed Jerusalem. One of the revengeful pretenders to the throne caused the assassination of Gedalia, which is described in second Kings, chapter 25, verse 25.

### Makes Generous Offer

Saskatchewan Postmaster Will Aid Jubilee Cancer Fund

The King George V. silver jubilee cancer fund management has received from a Saskatchewan village postmaster an offer to donate to the fund all the profits from his private business between now and the end of the campaign, May 6.

The postmaster wrote he operated a newspaper agency in addition to his post office and was prepared to surrender all profits from that business. The management noted in a press communique that contributions from individual clergymen "constitute the largest number from any one group."

### Are You Runtown, Tired?

Mr. Mohl Murphy of 12 Westbourne Ave., Apt. 4, Hamilton, Ont., said: "About five years ago I was terribly run-down and indigestion couldn't sleep or eat, lost weight and my weight fell 20 pounds. Before I had finished the last bottle of Dr. Pierce's Favorite Prescription I felt much better, had more strength and better digestion. Now size, tables 30 cents, liquid \$1.00. Large size, tablets or liquid, \$1.15.

## THE RHYMING OPTIMIST

By Aline Michaels

### THE HEART YOU LOVE

O, never hurt the heart you love  
Be shadowned by a doubt  
The scar you set upon that heart,  
Be found within your own!

For it is thus that time brings back  
The cruel deed you do;  
It leaves a stamp upon your life,  
Though none may know save you.

O, never let the heart you love  
Be shadowned by a doubt  
Which on your own may fall some day  
To drive the sunlight out.

O, never hurt the heart you love;  
Who knows how very far  
The wound may penetrate at last  
Or who may bear the scar?

Lifelines were launched on 340 occasions in the United Kingdom during 1934; 354 lives were saved, and help was given to 54 vessels.

A total of 5,899 cattle and 19 calves were exported from Canada to the United States from February 7 to 21, 1935.

## Little Helps For This Week

The Lord heareth your murmurings in His hand, which ye murmur against Him. Exodus 16-18.

Without murmur, uncomplaining, in His hand, Leave whatever things thou canst. Not understand.

One great characteristic of holiness is never to be exacting—never to complain. Each complaint drags us down a degree in our upward course. If you would discern in whom the spirit of God dwells, watch that person, and notice whether you ever hear him complain.

When we wish things to be otherwise than they are we lose sight of the great practical parts of the life of godliness. We wish and wish when, if we had done all that lies on us, we should fall quietly into the hands of God. Such wishing cuts the very sinew of our privileges and consolations. You are leaving me for a time, and you say you wish you could leave me better, or leave me with some assistance; but if it is right for you to go it is right for me to meet what lies before me without a wish that I had less to meet, or were better able to meet it.

### Times Work By Candles

When Two Burn Out English Flint-Knapper Goes Home

There is one man in England who still times his work by candles.

He is George Ashley, who burrows deep in the earth at Brandon in Suffolk, searching for the flints which his mate Herbert Field chips to fit the old flint-knappers still used in primitive places. They are two of the last flint-knappers, and old Mr. Ashley is surely the only man in England who preserves a candle to watch as a timekeeper.

Though he is seventy-one he still makes his way each morning down a shaft fifty feet deep, looking for flints as old Stone Age men in pits close by when they wanted to renew their arrowheads and axes. Besides his lunch he takes with him two candles, and when these are burned through he climbs up out of the pit and goes home. They tell him when his day's work is done.

### Housing Plan

Housing Scheme In Winnipeg Most Successful

The 1920 housing scheme had been "most successful" in Winnipeg, Alexander Officer, chief inspector of the division of sanitation and housing, told the parliamentary committee on housing at Ottawa. The house had been built at an average cost of \$4,000 for "white-collar men," who liquidated their obligation in the form of rent over a period of years, he said. The city housing commission had met all its obligations and continued to have money in hand.

Mr. Officer emphasized his own particular concern was public health. In Winnipeg, out of 46,819 houses, there were only 247 without sewer and water connections. He doubted if there was another city in Canada with the same record.

### Say It In Greek

A great Greek scholar, when visiting a woman's college in the United States, was asked whether he would be so kind as to translate the compliment of translating their college motto into Greek. He most courteously agreed and then asked what the motto was. It was placed before him and he read the words: "Pep without purpose is piffle."

A new solderless connector for electrical work eliminates the use of blowtorch and soldering iron, and assures a perfect connection.

In the strait and narrow way you avoid traffic jams.

Apply to your local agent or 226 Main Street, Winnipeg.

## When Caesar was a boy

The Forum was the common market-place for all of ancient Rome. Today a few crumbling columns stand as mute reminders of its former grandeur.

In our present day complex civilization, market-places have become scattered. It is no longer possible to visit them all in a morning—or even in a day.

Advertising, instead, has become the convenient Forum of modern buyers and sellers. If you are considering the purchase of a new car, you scrutinize the automobile advertising. Or if it's a razor or a radio that you want, you turn again to the advertising. Here is the national market place of merchandise.

Furthermore, as you leaf over those same pages of products, your mind is storing away for tomorrow a compact and valuable fund of information. Instinctively, you will remember those facts when you make your future purchases.

Advertising has become the common  
market-place of this twentieth century

## Town & District

A very good sized crowd attended the 30th annual firemen's dance Monday night. The attendance no doubt would have been much greater had not the Scout Jamboree in Calgary attracted many Gleichen people. Those who attended the dance state they had a good time and that it was on a par with the dances held in the past. S.F.O.U. Defeat 8 11; 1 (11-1) 12

The rain that fell Monday afternoon and again that evening will be of much benefit.

Monday was a great day in the lives of the Gleichen Cubs, Scouts and Girl Guides when they went to Calgary by special train to meet the Chief Scout, The Blackfoot Indian Scouts and Guides, with their Indian dances in the centre of the arena "tote the show," at least that is what Gleichen people think, since the big crowd showed great interest in the performance. They were under the leadership of Scoutmaster J. M. House.

Now is the time to clean up those back yards and alleys that are such an eyesore and a menace to good health. Some yards are cluttered up with tin cans, bottles, rubbish and refuse of all kinds, making them unsightly and unsanitary. Clean up and do it now, and while you are at it, don't forget to make your front yard and premises more attractive with flower beds and shrubs. Let all unite to make the town the most beautiful spot in Alberta.

The story is told of a woman who went to a spiritualist seance to talk to her dead husband. As soon as the medium had established communication with the departed spouse, the lady got into a hot argument with him.

Approximately 15,000,000 barrels of wheat flour are manufactured annually in Canada, besides many other kinds of flour, such as potato, corn, buckwheat, barley and rye. The consumption of flour in Canada averages one barrel per year per head of population. Canadian flour is exported to all parts of the world, principally to the British Isles.

### CARD OF THANKS

Mrs. W. F. Evans wishes to thank those people who assisted in anyway during the illness of Miss Kent. Their kind aid was much appreciated.

### IN A SCHOOLMASTER'S CREED

It is part of a schoolmaster's creed that boys and girls shall not go from his class thinking that facts and figures are most vital affairs of life. Facts and figures change with the whims of rulers and the pendulum of business. But the tried and tested virtues for honesty, moral uprightness, courage and persistence have raised nations from obscurity to eminence. Those same qualities have given uncounted men and women a sense of the grandeur of daily living.

A teacher tries to implant in his boys and girls an appreciation of this fact and to point out that the zeal of life is greatly increased if the battle is fought according to the best ethics that man has evolved to date.

In this schoolmaster's creed is recognition of the fact that one of the most important things a teacher can give his pupils is the right attitude toward work. Honest labor is man's reason for existing. A hard task, well done, is its own reward in the sense of satisfaction it gives the doer. Many adults lead unhappy lives because they have never learned life's primary lesson: the joy of working and of finishing a hard task.

In the schoolmaster's creed is a recognition of the individual differences of boys and girls. Some are quick to learn, others slow. Each has his or her special abilities and particular hobbies which are to be encouraged. Many a teacher has taught a child a finer and more lasting lesson through the medium of a hobby than through a book. That individual who goes through life without a hobby is missing some of the joys of living. One of the most important tenets of the schoolmaster's creed is that if boys and girls are to be adequately prepared for adult citizenship, they must practice good citizenship today. There are organizations in our schools whereby the pupils make their own laws and enforce them.

Our pupils know that "personal liberty ends where public injury begins." They know that democracy does not mean a form of government wherein everyone can do as he pleases. In the class room on the athletic field, and in other activities the students are exemplifying those principles of good citizenship which will govern their adult lives.
